

"All the pleasure of riding a bike,
with none of the pain".

COASTLINE

Foot to Floor Cycling

If you enjoy riding a bike but are put off by uncomfortable riding position, those saddle sores and struggling up hill or into headwinds, the new EZIP Coastline is the bike for you!

There is nothing more enjoyable than riding in a completely comfortable position while enjoying a stress-free panoramic view. The Coastline is designed to relieve the stress on your arms, back and derriere and by simply twisting the throttle, the Currie Electro-Drive system will pull you up hills effortlessly. And because of the Coastline's forward pedal design, when you come to a stop, your foot rests flat on the ground without any balancing act. Simply put, the Coastline delivers "all the pleasure of riding a bike, with none of the pain".
